### PROFESSIONAL SUMMARY

Detail-oriented Information Technology graduate with hands-on skills in Python, SQL, Power BI and Excel, seeking a Data Analyst role. Experienced in collecting, cleaning and analysing data, building dashboards and turning findings into clear business insights. Completed projects in AI-based retail analytics and geospatial emission analysis, backed by certifications in AI, cloud and databases. Strong communicator who works well with cross-functional teams.

### TECHNICAL SKILLS

**Data Analysis:** Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Reporting, KPI Tracking

**Programming & Databases:** Python (Pandas, NumPy, Matplotlib), SQL, Java

**BI & Analytics Tools:** Power BI, Microsoft Excel (Pivot Tables, Formulas, Charts), Google Earth

**Machine Learning:** Model Training, Algorithm Development, Predictive Analysis

**Cloud & IT:** Microsoft Azure Fundamentals, AWS Solutions Architecture, Troubleshooting, Technical Documentation

**Other:** HTML, CSS, Flutter, Android Studio, Unity, MS Word, Presentation Tools

### PROJECTS

#### Smart Retail Monitoring & In-Store Recommendation System (AI)

*Data Analysis | AI*

- Designed an AI-based approach to analyse in-store customer behaviour and generate product recommendations to improve customer satisfaction.
- Outlined data-driven monitoring to streamline store operations and strengthen security.

#### Urban Carbon Emission Detection using Google Earth Maps

*Geospatial Analysis*

- Analysed geospatial data to identify high-emission urban areas and support environmental planning decisions.
- Presented findings visually to make patterns and hotspots easy for non-technical stakeholders to understand.

#### AR/VR Game in Unity

*Software Development*

- Built an interactive 3D game with an immersive user experience, applying problem-solving and iterative testing.

### EDUCATION

#### Alliance University, Bengaluru

*June 2026*

Bachelor of Technology in Information Technology (Specialization: Software Development)

### CERTIFICATIONS

- Artificial Intelligence Fundamentals: IBM
- AI Foundation Associate: Oracle
- Microsoft Azure Fundamentals: Cloud Computing
- Solutions Architecture Job Simulation: AWS
- Database Management: SQL
- Web Development: HTML, CSS
- Game Design & Development

### ACTIVITIES & LEADERSHIP

- Volunteered and helped manage events with 500+ participants, coordinating logistics and teams.
- Participated in a national-level Ideathon 2K25 at PCU.
- Active participant in science fest and social activities.

### SOFT SKILLS & LANGUAGES

**Soft Skills:** Analytical Thinking, Critical Thinking, Communication, Problem Solving, Time Management, Conflict Resolution

**Languages:** English, Hindi, Kannada, Marathi (Fluent)
